PROFESSIONAL SUMMARY

Frontend developer with 3+ years of experience building web applications using React.js, Next.js, and TypeScript. Worked across startups and contract roles, contributing to dashboards, business tools, and client-facing UIs. Comfortable with the full frontend workflow — from integrating APIs and managing state to responsive layouts and performance basics. Still growing, but ships clean, maintainable code and picks up new things quickly.

CORE SKILLS

Frontend:

React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, MUI, Ant Design

State Management:

Redux, Redux Toolkit, Async Thunks

Backend & APIs:

REST APIs, Node.js, Express.js, MongoDB, GraphQL (Apollo Client)

Performance Optimization:

Code Splitting, Lazy Loading, Memoization, Dynamic Imports, Lighthouse Optimization

Tools & Workflow:

Git, GitHub, Postman, Thunder Client, Vercel, Agile/Scrum, AI-assisted development (ChatGPT, Amazon Q)

Other:

Responsive Design, Progressive Web Apps (PWA), Framer Motion

PROFESSIONAL EXPERIENCE

Frontend Developer | Clove.IT Pvt. Ltd, Nepal — Remote (2025 – Present | Contract)

- Refactored legacy React codebase into modular, reusable components, improving UI consistency across multiple features
 - Implemented lazy loading and dynamic imports to optimize initial page load performance
 - Improved rendering efficiency through memoization and component-level optimizations
 - Participated in code reviews and contributed to frontend code quality and maintainability standards
-

Frontend Developer | AppX Technologies Pvt. Ltd — Remote (2024 | Part-time / Contract)

- Delivered production-ready React UI features and bug fixes under strict deadlines
 - Built and maintained task-based frontend components for client applications
 - Improved user experience through iterative UI refinements and responsive design improvements
-

Frontend Developer | LightBulb Technology Pvt. Ltd, Nepal | Hybrid (Sep 2022 – 2024)

- Worked on frontend development of analytics dashboards used by internal teams
 - Integrated REST APIs using Redux Toolkit for state management and data handling
 - Built reusable components and applied code-splitting to improve frontend scalability
 - Collaborated on UI decisions for dashboard applications
-

Junior Frontend Developer | CodAvatar Tech Pvt. Ltd, Nepal (Jun 2022 – Sep 2022)

- Built reusable React components under senior developer guidance
 - Contributed to API integration and frontend feature development
 - Worked with Git-based workflows, including branching, pull requests, and collaborative development practices
-

Technical Support & Early Career Experience (2017 – 2022)

- Provided technical support and customer-facing troubleshooting
- Developed strong problem-solving, communication, and analytical skills
- Transitioned into software development through hands-on learning and practice

PROJECTS

BS-AD Calendar React — Reusable Date Picker Library

- Published a React date picker with Bikram Sambat (BS) and Gregorian (AD) dual-calendar support
 - Implemented date conversion with support for single date, range selection, and preset ranges (e.g., last 7 days, this month)
 - Added Nepali localization (months, days, numerals) with full TypeScript support
 - Built configurable components with validation (min/max constraints), keyboard navigation, and theming via CSS variables (dark mode support)
 - Used across multiple applications for consistent date handling
 - **Tech:** React.js, TypeScript
 - **npm:** [bs-ad-calendar-react](#) | [GitHub](#)
-

Xpenza — Expense Tracker (PWA)

- Built a full-stack expense tracking application with Google OAuth authentication.
 - Implemented dynamic filtering (date ranges, categories, debounced search) with real-time updates to UI and charts
 - Developed an analytics dashboard for trend analysis, category distribution, and income vs expense breakdown
 - Added budget tracking with visual indicators and threshold alerts
 - Enabled CSV/PDF export and bulk operations
 - **Tech:** Next.js 15, TypeScript, MongoDB, Tailwind CSS, NextAuth.js, Recharts
 - **Live:** [Xpenza](#) | [GitHub](#)
-

Resufy — Resume Builder with ATS Scoring

- Built a resume builder with multiple templates and a real-time preview with PDF export
- Implemented ATS scoring system to analyze resumes and suggest keyword improvements
- Added multi-profile management with configurable section visibility
- Developed responsive templates using React-PDF for consistent document generation
- Enabled public share links for recruiter access without authentication
- Used by early users for resume creation and iteration
- **Tech:** Next.js 15, TypeScript, MongoDB, Tailwind CSS, NextAuth.js, react-pdf
- **Live:** [Resufy](#) | [GitHub](#)

EDUCATION

B.Sc. in Computer Science and Information Technology (CSIT)

Tribhuvan University — 2022

ADDITIONAL INFORMATION

Languages: English, Nepali, Hindi

Availability: Open to full-time remote roles (Immediate / Negotiable)

Timezone: GMT+5:45 (Flexible overlap with US/EU time zones)
