PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of professional experience building web applications with **React.js, Next.js, TypeScript, and modern frontend tooling**. Experienced in developing reusable component systems, integrating REST APIs, managing application state, and improving frontend performance.

Currently focused on **refactoring and maintaining production React applications**, with hands-on experience improving code structure, reducing duplication, and applying performance optimization techniques. Also experienced in developing reusable developer tools and full-stack applications using Next.js and MongoDB.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI, Ant Design

State Management & APIs: Redux Toolkit, Redux, Async Thunks, REST APIs, GraphQL, Apollo Client

Frontend Engineering: Reusable Components, Responsive Design, Code Splitting, Lazy Loading, Dynamic Imports, Memoization, Performance Optimization

Backend & Data: Node.js, Express.js, MongoDB

UI & Visualization: Recharts, Framer Motion, Progressive Web Apps (PWA)

Tools: Git, GitHub, Postman, Thunder Client, Vercel, npm

PROFESSIONAL EXPERIENCE

Frontend Developer

clove.IT Pvt. Ltd. — Remote
2025 – Present · Contract

- Refactored and modularized an existing React codebase by extracting reusable components and reducing duplicated implementation.
- Improved frontend maintainability by restructuring components and separating reusable UI logic from feature-specific code.
- Implemented **lazy loading and dynamic imports** to reduce unnecessary initial loading and improve application performance.
- Applied **memoization and component-level optimization** to reduce unnecessary rendering.
- Participated in code reviews and contributed to frontend coding standards, maintainability, and overall code quality.
- Worked within an existing production codebase, balancing new feature development with incremental architectural improvements.

Frontend Developer

AppX Technologies Pvt. Ltd. — Remote
2024 · Part-time / Contract

- Developed and maintained production React features for client applications.
- Implemented reusable frontend components and integrated application APIs.
- Delivered feature development and bug fixes within deadline-driven development cycles.
- Improved responsive layouts and user interactions through iterative UI improvements.

Frontend Developer

LightBulb Technology Pvt. Ltd. — Nepal, Hybrid
Sep 2022 – 2024

- Developed frontend features for analytics and business dashboards used by internal teams.
- Integrated REST APIs and managed asynchronous application state using **Redux Toolkit and Async Thunks**.
- Built reusable React components to improve consistency and reduce duplicated UI implementation.
- Applied code-splitting techniques to improve application scalability and loading performance.
- Collaborated with team members on dashboard UI implementation and frontend feature development.

Junior Frontend Developer

CodAvatar Tech Pvt. Ltd. — Nepal

Jun 2022 – Sep 2022

- Developed reusable React components under senior developer guidance.
- Integrated APIs and contributed to frontend feature development.
- Worked with Git-based development workflows, including branches, pull requests, and collaborative development.
- Contributed to maintaining and improving existing frontend functionality.

Technical Support & Early Career Experience

2017 – 2022

- Provided technical support and customer-facing troubleshooting.
- Developed practical problem-solving, communication, and analytical skills.
- Transitioned into professional software development through hands-on learning and project development.

SELECTED PROJECTS

BS-AD Calendar React

Reusable React Date Picker Library

A reusable React date-picker library supporting **Bikram Sambat (BS)** and **Gregorian (AD)** calendars.

- Published a reusable React package through npm with full TypeScript support.
- Implemented BS/AD date conversion with single-date and range selection.
- Added preset date ranges including **Last 7 Days** and **This Month**.
- Implemented Nepali localization for months, weekdays, and numerals.
- Added minimum/maximum date validation and keyboard navigation.
- Built configurable theming using CSS variables, including dark-mode support.
- Designed the package for reuse across multiple applications requiring BS calendar support.

Tech: React.js, TypeScript

npm: [react-bs-ad-datepicker](https://www.npmjs.com/package/react-bs-ad-datepicker)

SmartAccounts

Multi-Business ERP & Business Management Platform

A business management platform designed for small and medium-sized businesses to manage sales, purchases, inventory, customers, payments, accounting, and reporting in a unified system.

- Designed a **multi-business architecture** with business-scoped authentication, authorization, and data access.
- Built sales, purchases, inventory, customer, payment, and accounting workflows with interconnected business logic.
- Implemented inventory costing and stock movement logic to maintain consistent stock quantities and cost calculations across transactions.
- Developed sale editing and replacement workflows while preserving transaction history and maintaining accounting and inventory consistency.
- Implemented role-based access control for platform administrators, business owners, and members.
- Designed business-level data isolation using server-derived business context rather than trusting client-provided business identifiers.
- Built reusable frontend components and domain-oriented services using **Next.js, React, TypeScript, and MongoDB**.
- Designed a business backup and restore system with scoped exports, compressed EJSON data, checksums, validation, preview, and restore-as-new-business workflows.

Tech: Next.js, React, TypeScript, Node.js, MongoDB, NextAuth.js, Tailwind CSS

Xpenza

Full-Stack Expense Tracker · Progressive Web App

A full-stack expense and income tracking application with authentication, analytics, budgeting, and data export.

- Built the application using **Next.js, TypeScript, MongoDB, and Tailwind CSS**.
- Implemented Google OAuth authentication using NextAuth.js.
- Developed dynamic filtering by date range and category with debounced search.
- Built analytics dashboards for spending trends, category distribution, and income-versus-expense analysis.
- Implemented budget tracking with visual indicators and threshold alerts.
- Added CSV/PDF export and bulk data operations.
- Built responsive interfaces designed for desktop and mobile use.

Tech: Next.js 15, TypeScript, MongoDB, Tailwind CSS, NextAuth.js, Recharts
